The 2027 rate change

Last Modified on 11/23/2026 2:47 pm EST

On January 1, 2027, the residential customer charge and electric energy rates go up. For a typical home using 900 kWh a month, that's about $8 more per month.

Electric customer charge	$14.00 a month	$15.50 a month
Standard energy	13.2 cents per kWh	13.9 cents per kWh
Time-of-use on-peak	24.8 cents per kWh	26.1 cents per kWh
Time-of-use off-peak	9.6 cents per kWh	10.1 cents per kWh
Water	No change	No change

Why rates are changing

- Replacing aging poles, wires and water mains, much of it installed in the 1970s
- Higher costs for the power we buy on the wholesale market
- Storm hardening, so outages are shorter and less frequent

If the change is hard on your budget

Budget billing and assistance programs can help. Call (555) 018-2200 (weekdays, 7 a.m. to 7 p.m.) and we'll walk through your options.
